

SUPERIOR TECHNOLOGY

ENCLOSURE

The shape is ideal for loudspeakers:

- No parallel surfaces = no standing waves
- Curved shape with varying radius throughout = self bracing structure
- Triangular reinforcements = diffuses internal sound
- Volumetric efficient shape = sounds larger, looks small
- Appeal to both men and women = performance and looks

WIRELESS

- AirPlay
- Bluetooth

AMP

- 4x90W RMS = unparalleled 360W RMS
- Discrete output stage = low THD and noise
- Fully protected = very reliable

DRIVERS

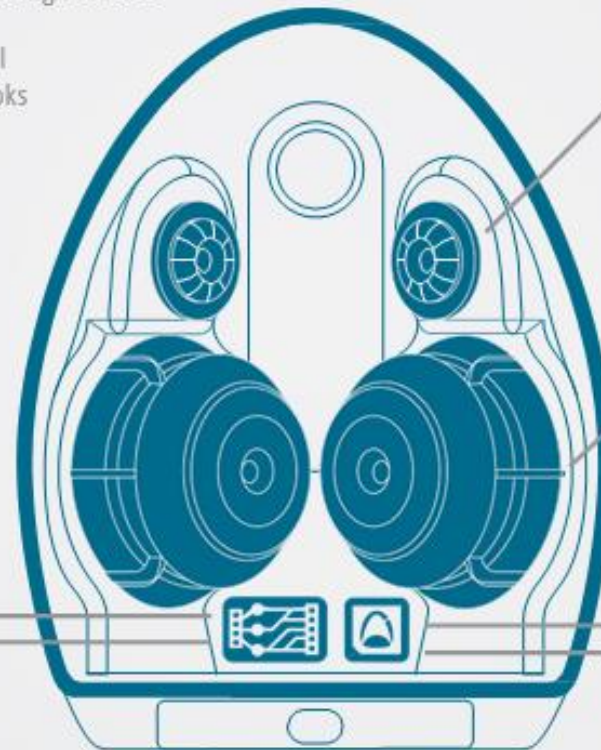

- Designed from the ground up by M17 Engineering = IP and cost control
- Patent pending motor structure on woofers = 30% more output than competitors at same cost and size
- Super long throw woofer = more bass for the same size unit
- State of the art acoustic knowledge built in = best in class sound
- Super linear motor structure of woofer and tweeter = best in class distortion figures

DSP

- Speaker EQ = optimized frequency
- Bass management
- L/R decorrelation
- Dynamics management
- Special user modes (midnight mode etc.)
- Placement optimization settings

UI/SW

- App for user interaction - placement - modes - system config (1/2/more Eggs etc.)
- Speaker controls play, pause, skip/scan
- FW updates through app
- Energy Star Compliant
- Dual EGG Mode

M17 PATENTS
